

Pro Steel Shooting

This new sport was just added last year to our range. Modern rifles are used; or, if you really wish to challenge yourself, you can use a pistol. The calibers allowed are 9mm, 40, or 45acp. The ammo can be full metal jacket, lead, or frangible ammo. No plus-p, tracer ammo, or armor piercing rounds are allowed. No defensive hollow points or defensive fragmenting rounds may be used. The game is usually shot from 3 different positions, and 1 magazine change is required. You move with a loaded gun, but your finger is off the trigger unless you are aiming at a target.

Shoots are held after Wild
Bunch Shoots finish up.
